I am a subscriber of Xm Radio, and I am deeply troubled that there is a Bill in the House in an effort to try to put an end to road and weather info. As I use that service on a daily basis FOR MY WORK IN TRANSPORTING AMERICA'S WAY OF LIFE. I am horrified that an association would go so openly to try and distract our Economy. Isn't that a form of domestic terrorism? Would you the FCC support something like that?.....we shall see.
